

file are used to produce reports. The correct symbolic information in merged symbol file 650 **[[630]]** for the modules used in the trace is identified based on a number of validating criteria.

Please replace the paragraph on page 39, lines 1-9 with the following new paragraph:

Thus, an indexed database of symbolic data for loaded modules is obtained by gathering symbolic data from a plurality of sources into a merged symbol file, such as merged symbol file 650 **[[630]]** in **Figure 6**, and then comparing this merged symbol file with performance trace data that is stored in either the trace buffer or in a trace file on a storage device. Matching symbolic data is then written to an indexed database in correspondence with the performance trace data.
